

Job Options Supported, by Product

There are several options that affect the overall execution of the job that are not standard Job Control options. These options are supported by many programs but not all. These options are described in [Table 2.2](#) of the *Job Control Guide*. The support of these options is summarized in [Table 1](#).

Table 1. Support of nonstandard job options, by product and program.

Product	Program	-NOLOCAL	-LOCAL	-WAIT	-NOJOBID
